Clarification of Automobile Statistical Plan Kind of Loss Code 2A

GISA Bulletin 2021-04 set forth new Automobile Statistical Plan reporting requirements for All Perils and Comprehensive coverages. New Kind of Loss (KoL) code 2A is defined as “Impact with a live undomesticated animal” and is to be reported for Accident Dates on or after January 1, 2022.

There have been inquiries as to which animals are considered domesticated, how undomesticated animals are to be reported or whether the animal must be alive or dead. GISA in consultation with the regulators, have broadened the definition of KoL 2A to “Impact with animal(s)” and is to be used to report any impacts with animals as covered under Section C of the Automobile Policy.

This new definition will be reflected in the next published release of the Automobile Statistical Plan manual.

If you have any questions related to these changes, please contact your Data Quality Analyst at IBC: 416-445-5912 or 800-761-6703.
