

Occasional Operators – Type of Use 05/06 - May 2010

In our daily communication with reporting companies, we receive questions regarding the correct reporting requirements for various data fields, on an occasional operator.

Some of the data fields frequently questioned are those pertaining to the Operator information fields:

Vehicle use
Number of Claims
Number of years Claims Free
Rated Operator Year of Birth
Rated Operator Number of years licensed
Rated Operator Drivers Training Certificate
Rated operator Gender
Number of Other Operators (other than the Principal Operator)
Other Operator Number of Years Licensed

When reporting a record with Type of Use 05 or 06, you must always report the above information on the occasional operator (s) only.

You must not combined this information with the principal operator or report any of the information of the principal operator on a type of use 05 or 06.
